Medical Coding & Healthcare RCM

Master the Healthcare & Medical Coding.

Duration: 3 Months | Mode: Online | Level: Beginner to Advanced
Powered by CodeEmy!

REGISTER NOW

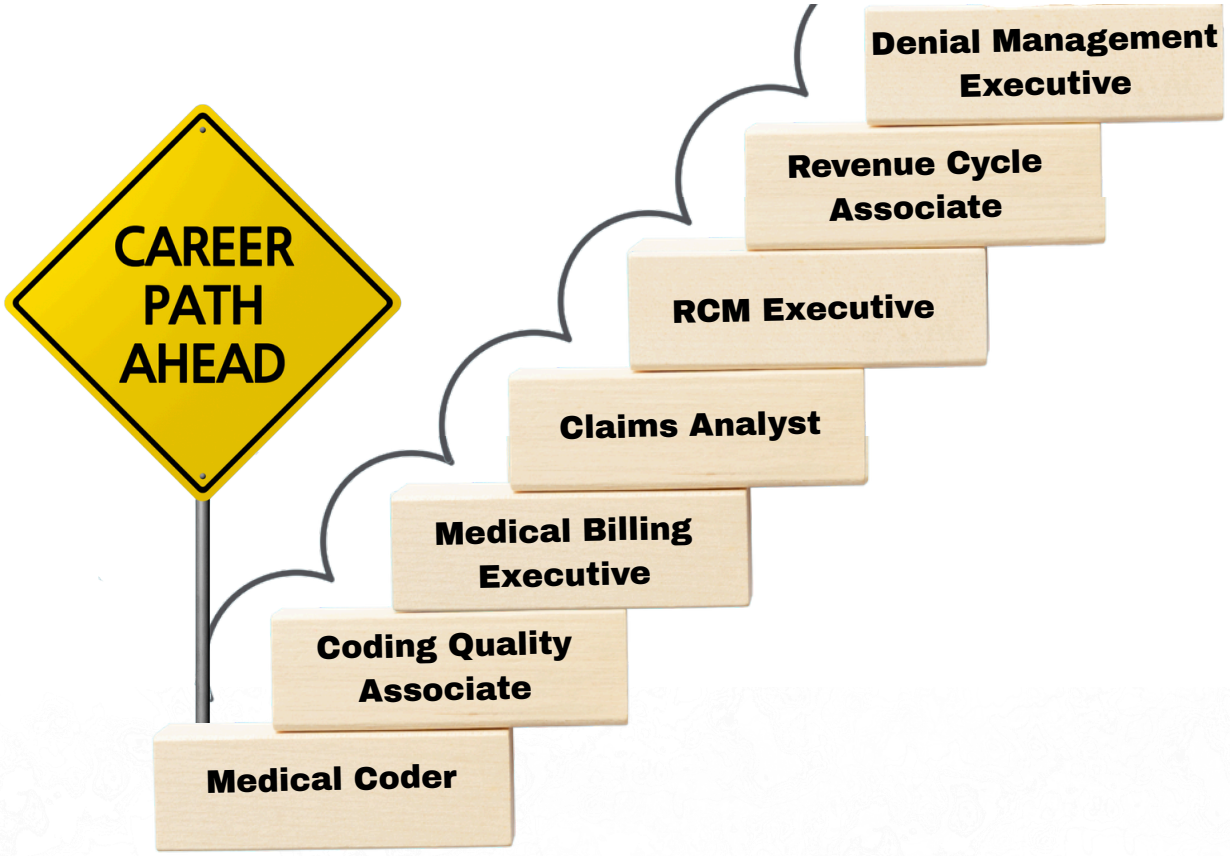

Scope of
Healthcare & Medical Coding Industry

- Growing demand for Medical Coding professionals
- Healthcare BPO & RCM industry
- Hospitals & Healthcare Organizations
- Health Insurance & Claims Processing
- Medical Billing & Revenue Cycle Management
- Clinical Documentation & Coding
- Healthcare Data & Documentation Services
- Opportunities in India & Global Healthcare Operations

What Students Will Learn

Medical Terminology → Anatomy → ICD-10-CM → CPT → HCPCS → Medical Billing → Claims → RCM → Denial Management → Specialty Coding

Here is all the Career Fields you can excel at

CAREERS

Overview:

Curriculum

Week 1

- Introduction to Healthcare Industry
- Medical Coding & Medical Billing
- Healthcare RCM Overview
- Healthcare Providers, Payers & Insurance
- Medical Coder Roles & Responsibilities

Project: Analyze a Sample Patient Record

Week 2

- Medical Prefixes, Suffixes & Root Words
- Common Medical Abbreviations
- Disease & Diagnostic Terminology
- Surgical & Treatment Terminology
- Healthcare Documentation Terms

Project: Create a Medical Terminology Casebook

Week 3

- Human Body Systems Overview
- Cardiovascular & Respiratory Systems
- Digestive & Urinary Systems
- Nervous & Musculoskeletal Systems
- Endocrine, Reproductive & Integumentary Systems

Project: Body System & Disease Mapping

Week 4

- Types of Medical Records
- Physician & Progress Notes
- Operative Reports & Discharge Summaries
- Diagnosis vs Symptoms
- Primary & Secondary Diagnosis

Project: Analyze Medical Documentation

Week 5

- Introduction to ICD-10-CM
- Alphabetic Index & Tabular List
- Code Categories & Code Selection
- Laterality & Combination Codes
- Includes, Excludes & Coding Guidelines

Project: ICD-10-CM Diagnosis Coding Cases

Week 6

- Introduction to CPT
- CPT Code Structure
- Evaluation & Management
- Surgery & Anesthesia
- Radiology, Pathology & Medicine
- **Project:** CPT Procedure Coding Case Study

Week 7

- Introduction to HCPCS Level II
- Supplies, Equipment & Services
- CPT vs HCPCS
- Modifiers & Billing Concepts
- Patient Registration & Charge Capture

Project: Prepare a Simulated Medical Bill

Week 8

- Healthcare Claims Lifecycle
- CMS-1500 Claim Concepts
- Electronic Claims
- Claim Submission
- Claim Rejection & Error Identification

Project: End-to-End Claim Processing

Week 9

- Introduction to Healthcare RCM
- Front-End, Mid-Cycle & Back-End RCM
- Eligibility & Insurance Verification
- Authorization & Charge Capture
- Payment Posting & Accounts Receivable

Project: Build a Complete RCM Workflow

Week 10

- Introduction to Claim Denials
- Common Denial Reasons
- Eligibility & Authorization Denials
- Coding & Documentation Denials
- AR Follow-up & Denial Prevention

Project: Analyze & Resolve Denied Claims

Week 11

- Cardiology & Orthopedics
- Gastroenterology & Neurology
- Pulmonology & Emergency Medicine
- Surgery & Radiology
- Multi-Specialty Coding Cases

Project: Multi-Specialty Coding Portfolio

Week 12

- Complete Medical Coding Workflow
- Coding & Billing Case Simulation
- RCM & Denial Management
- Practical Coding Assessment
- Resume & Interview Preparation

Project: Complete Healthcare RCM Capstone

Hands - On Projects

Mini Projects (Beginner to Intermediate Level)

1. Medical Terminology & Patient Chart Analysis
Skills Used: Medical terminology, anatomy basics, healthcare documentation
Goal: Analyze sample patient charts and identify medical terms, symptoms, diagnoses, and relevant clinical information.

2. ICD-10-CM Diagnosis Coding Case Study
Skills Used: ICD-10-CM, diagnosis identification, code lookup, coding guidelines
Goal: Review sample medical records and assign appropriate diagnosis codes based on the documented conditions.

3. Medical Billing & Claim Preparation
Skills Used: CPT, HCPCS, medical billing, claim workflow
Goal: Prepare a simulated healthcare claim by identifying procedures, services, codes, and billing information.

Major Projects (Advanced Level)

1. Complete Medical Coding & Billing Workflow
Skills Used: Medical documentation, ICD-10-CM, CPT, HCPCS, billing
Goal: Process a complete patient case from medical documentation through diagnosis coding, procedure coding, and simulated claim preparation.

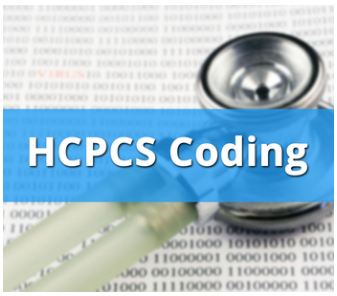

2. Healthcare RCM & Denial Management Project
Skills Used: Revenue Cycle Management, claims processing, payment posting, AR, denial management
Goal: Analyze a complete RCM cycle and identify, investigate, and resolve simulated claim denials.

3. End-to-End Healthcare RCM Capstone Project
Skills Used: Medical coding, billing, claims, RCM, AR, denial management, reporting
Goal: Manage a simulated healthcare case from Patient Registration → Insurance Verification → Coding → Claim Submission → Payment/Denial → AR Follow-up → Final RCM Report.
