Pharmacovigilance & Drug safety

Ensure Drug Safety. Master Pharmacovigilance.

Duration: 3 Months | Mode: Online | Level: Beginner to Advanced
Powered by CodeEmy!

Scope of
Pharmacovigilance & Drug Safety Industry

- Drug Safety & Patient Safety
- Clinical Research & Clinical Trials
- Adverse Event Monitoring
- Individual Case Safety Reports (ICSR)
- Case Processing & Assessment
- Medical Coding
- Signal Detection & Management
- Literature Surveillance
- Aggregate Safety Reporting
- Risk Management
- Pharmaceutical & CRO Operations

What Students Will Learn

- Clinical Research → Drug Safety → AE/ADR → ICSR → Case Processing → Medical Coding → MedDRA → Causality → Signal Detection → Aggregate Reporting → Safety Database → Case Closure

Here is all the Career Fields you can excel at

CAREERS

Overview:

Curriculum

Week 1

- Introduction to Pharmacovigilance & Drug Safety & Patient Safety
- Drug Development Lifecycle & Preclinical & Clinical Development
- Clinical Trial Phases, Sponsor, CRO & Regulatory Authorities
- Role of Pharmacovigilance in Drug Development
- Post-Marketing Safety Surveillance
- Introduction to Drug Safety Operations

Project: Map the Drug Safety Lifecycle

Week 2

- Adverse Event (AE) & Adverse Drug Reaction (ADR)
- Serious Adverse Event (SAE) & Seriousness Criteria
- Severity vs Seriousness, Expectedness & Causality
- Suspected Adverse Reactions & Product Quality Complaints
- Medication Errors & Special Situations

Project: AE / ADR / SAE Case Classification

Week 3

- Introduction to ICSR & Minimum Case Criteria
- Case Identification, Case Intake & Initial Case Assessment
- Valid vs Invalid Cases, Follow-up Cases & Duplicate Cases
- Case Sources & Consumer & Healthcare Professional Reports

Project: ICSR Case Intake & Assessment

Week 4

- Case Creation, Patient Information & Reporter Information
- Suspect Product, Concomitant Products & Adverse Events
- Medical History, Laboratory Information & Case Narrative
- Case Assessment,Follow-up Information & Case Closure

Project: Process a Complete Simulated ICSR

Week 5

- Introduction to Medical Coding in PV
- MedDRA Overview & MedDRA Hierarchy
- SOC, HLGT, HLT, PT & LLT
- Adverse Event Coding & Medical History Coding
- Indication Coding & Coding Review

Project: MedDRA Coding Case Study

Week 6

- Introduction to Drug Coding & Suspect & Concomitant Medications
- Drug Name Identification & Generic vs Brand Names
- Indication & Drug Relationship & Medication Errors
- Product Quality Complaints & Drug Coding Concepts
- Coding Review & Reconciliation

Project: Drug & Safety Data Coding Exercise

Week 7

- Causality Assessment & Seriousness Assessment
- Severity Assessment & Expectedness Assessment
- Medical Review Concepts & Case Prioritization
- Clinical Assessment & Dechallenge & Rechallenge
- Case Completeness & Quality Review

Project: Complete Safety Case Assessment

Week 8

- Introduction to Safety Databases & Safety Case Lifecycle
- Case Intake, Data Entry, Validation & Medical Coding
- Case Assessment, Quality Control & Follow-up
- Case Closure & Audit Trail Concepts

Project: Simulated Safety Database Workflow

Week 9

- Introduction to Signal Detection
- Safety Signals, Signal Identification, Validation & Assessment
- Signal Prioritization, Trend Analysis & Case Series Review
- MedDRA Queries / SMQ Concepts & Benefit-Risk Concepts

Project: Simulated Safety Signal Detection

Week 10

- Pharmacovigilance Literature Surveillance
- Literature Search Concepts & Identification of Safety Cases
- Literature Case Processing & Aggregate Safety Reports
- PSUR / PBRER Overview, DSUR Overview, Safety Data Analysis & Report Preparation Concepts

Project: Literature Surveillance & Safety Report

Week 11

Introduction to Global PV Regulations

- ICH Pharmacovigilance Concepts & GVP Principles
- FDA Drug Safety Concepts & EMA Pharmacovigilance Framework
- CDSCO / Indian Regulatory Context & Safety Reporting Timelines
- Pharmacovigilance Quality Management & SOPs, Documentation Compliance & Audit Readiness

Project: Regulatory Safety Reporting Case Study

Week 12

- Complete ICSR Processing, Medical & Drug Coding
- Case Assessment & Follow-up Management
- Quality Review, Signal Detection & Literature Surveillance
- Aggregate Reporting Concepts, Final Safety Case Portfolio, Resume Preparation Interview Preparation

Project: End-to-End Pharmacovigilance Capstone

Hands - On Projects

Mini Projects (Beginner to Intermediate Level)

1. Adverse Event Classification Case Study
Skills Used: AE, ADR, SAE, seriousness, severity
Goal: Analyse simulated safety cases and classify adverse events according to the information provided.

2. ICSR Case Intake & Processing
Skills Used: Case intake, patient information, product information, event assessment
Goal: Process a simulated Individual Case Safety Report from initial receipt to case completion.

3. MedDRA & Drug Coding Exercise
Skills Used: MedDRA concepts, adverse event coding, drug coding
Goal: Code simulated adverse events and medication information using appropriate terminology concepts.

Major Projects (Advanced Level)

1. Complete ICSR Case Processing Project
Skills Used: Case intake, data entry, medical coding, seriousness, causality, narrative
Goal: Process multiple simulated safety cases from Case Receipt → Data Entry → Coding → Assessment → Narrative → Quality Review → Closure.

2. Pharmacovigilance Signal Detection Project
Skills Used: Safety data review, case series, MedDRA concepts, signal identification
Goal: Analyse a simulated safety dataset, identify potential safety trends and prepare a basic signal assessment report.

3. End-to-End Drug Safety Capstone Project
Skills Used: ICSR, MedDRA, drug coding, case assessment, literature surveillance, signal detection, reporting
Goal: Execute a complete simulated pharmacovigilance workflow from Case Intake → ICSR Processing → Coding → Assessment → QC → Signal Review → Safety Reporting.
